

ENGLISH

ADVANCED PROGRAMMING

05 USER: (APPLiCAT® d) only it links an ID code (from 1 to 9999) to the user of the displayed consumption (three 1-phase independent users by instrument).

06 SELECTor: it allows selecting the variables combination (page) to be displayed according to the knob position (see fig.2); SELEC. 1 (2,3, LoC): it selects the knob position (1, 2, 3 o □); PA.1 (36): it selects the page number to be displayed (from No. 1 to 36 see TAB 3). If the page relevant to the current position of the knob is not available for the required application, the instrument will display the first page available according to the list in table 3.

07 SYS: it allows selecting the electrical system. 3P.n: 3-phase unbalanced with or without neutral; 3P.I: 3-phase balanced with or without neutral; 2P: 2-phase; 1P: single phase.

08 Ut rAtio: VT ratio (0.1 to 6000). Example: if the connected VT primary is 5kV and the secondary is 100V, the VT ratio to be set is 50 (that is 5000/100).

09 Ct rAtio: CT ratio (0.1 to 60.00k). Example: if the connected CT primary is 3000A and the secondary is 5A, the CT ratio is 600 (that is: 3000/5).

10 P int.ti: it is the integration time used to calculate the demanded powers (Wdmd, VAdmd). The selectable range is between 1 and 30 minutes.

11 diG in 1 / diG in 2 / diG in 3: ("I3" option only) it allows defining the digital inputs function: rEM: for reading the digital input status by means of serial communication; SYnC: dmd calculation synchronisation; tAr: multi-tariff management (see also Tab. 6); GAS: gas metering; Cold: cold water metering; Hot: hot water metering; kWh + Hot: distant heating (kWh) meters. PrESCAL.1 (or 2 or 3): it sets the weight of each pulse (from 0.1 to 999.9 m³ or kWh per pulse). Note: the digital inputs have to be set with different modes among them, in case they are used for GAS, CoLd o Hot kWh+ Hot.

12 FiLTER.S: it allows selecting the operating range of the digital filter as % of the full scale values (1 to 100). Only in case of applications F, G and H.

13 FiLTER.Co: it allows selecting the filtering coefficient (from 1 to 32). The higher the coefficient, the higher is the stability and the updating time of the measurement.

14 AddrESS : ("SI" option only) it allows selecting the serial address of the instrument (from 1 to 247). bAudrAtE: it allows selecting the baud rate (9.600 or 4.800 baud).

15 diG out. 1 / diG out. 2 ("01", R2 or 03) it allows selecting the digital outputs function. PuLS: pulse output selection (the pulse weight is to be set too) (kWh/kvarh per pulse from 0.001 to 10.0); tEST: activated on the pulse output when "YES" is selected. In the further menu program the simulated power value (kW or kvar) is corresponding to a pulse frequency proportional to it and based on the "PULSEou.1/2/3". The test is active until you exit from this menu. AL: alarm output (this function is active only in case of application C, E, G and H), selection of the variable to be controlled (Ph.AL: phase sequence alarm), and deactivation setpoints "on AL" and "off AL", the delay on activation "tDEl" and the output status in normal condition, "nE" if normally energised or "nd" if normally de-energised, are to be set too. rEM: it allows the remote control of the digital output.

16 EnE t.rES: it allows the reset of all the total counters.

17 End: it allows exiting the programming mode by pressing the joystick in direction 1 (see fig. 1). Joystick directions 4 and 5 allow browsing the main menu again.

ITALIANO

PROGRAMMAZIONE AVANZATA

05 USER: (solo "APPLiCAT" d) associa un codice identificativo (da 1 a 9999) all'utente del consumo visualizzato (3 utenti monofase indipendenti per strumento).

06 SELECTor: seleziona combinazione variabili (pagina) di visualizzazione da associare alla posizione del selettore frontale (fig. 2); SELEC. 1 (2, 3, LoC): seleziona la posizione del selettore (1, 2, 3 o □); PA.1 (36): seleziona la pagina da visualizzare (da No. 1 a 36 vedere TAB 3). Se la pagina associata alla relativa posizione del selettore non è disponibile per l'applicazione richiesta, lo strumento visualizzerà la prima pagina disponibile secondo l'elenco riportato in tab. 3.

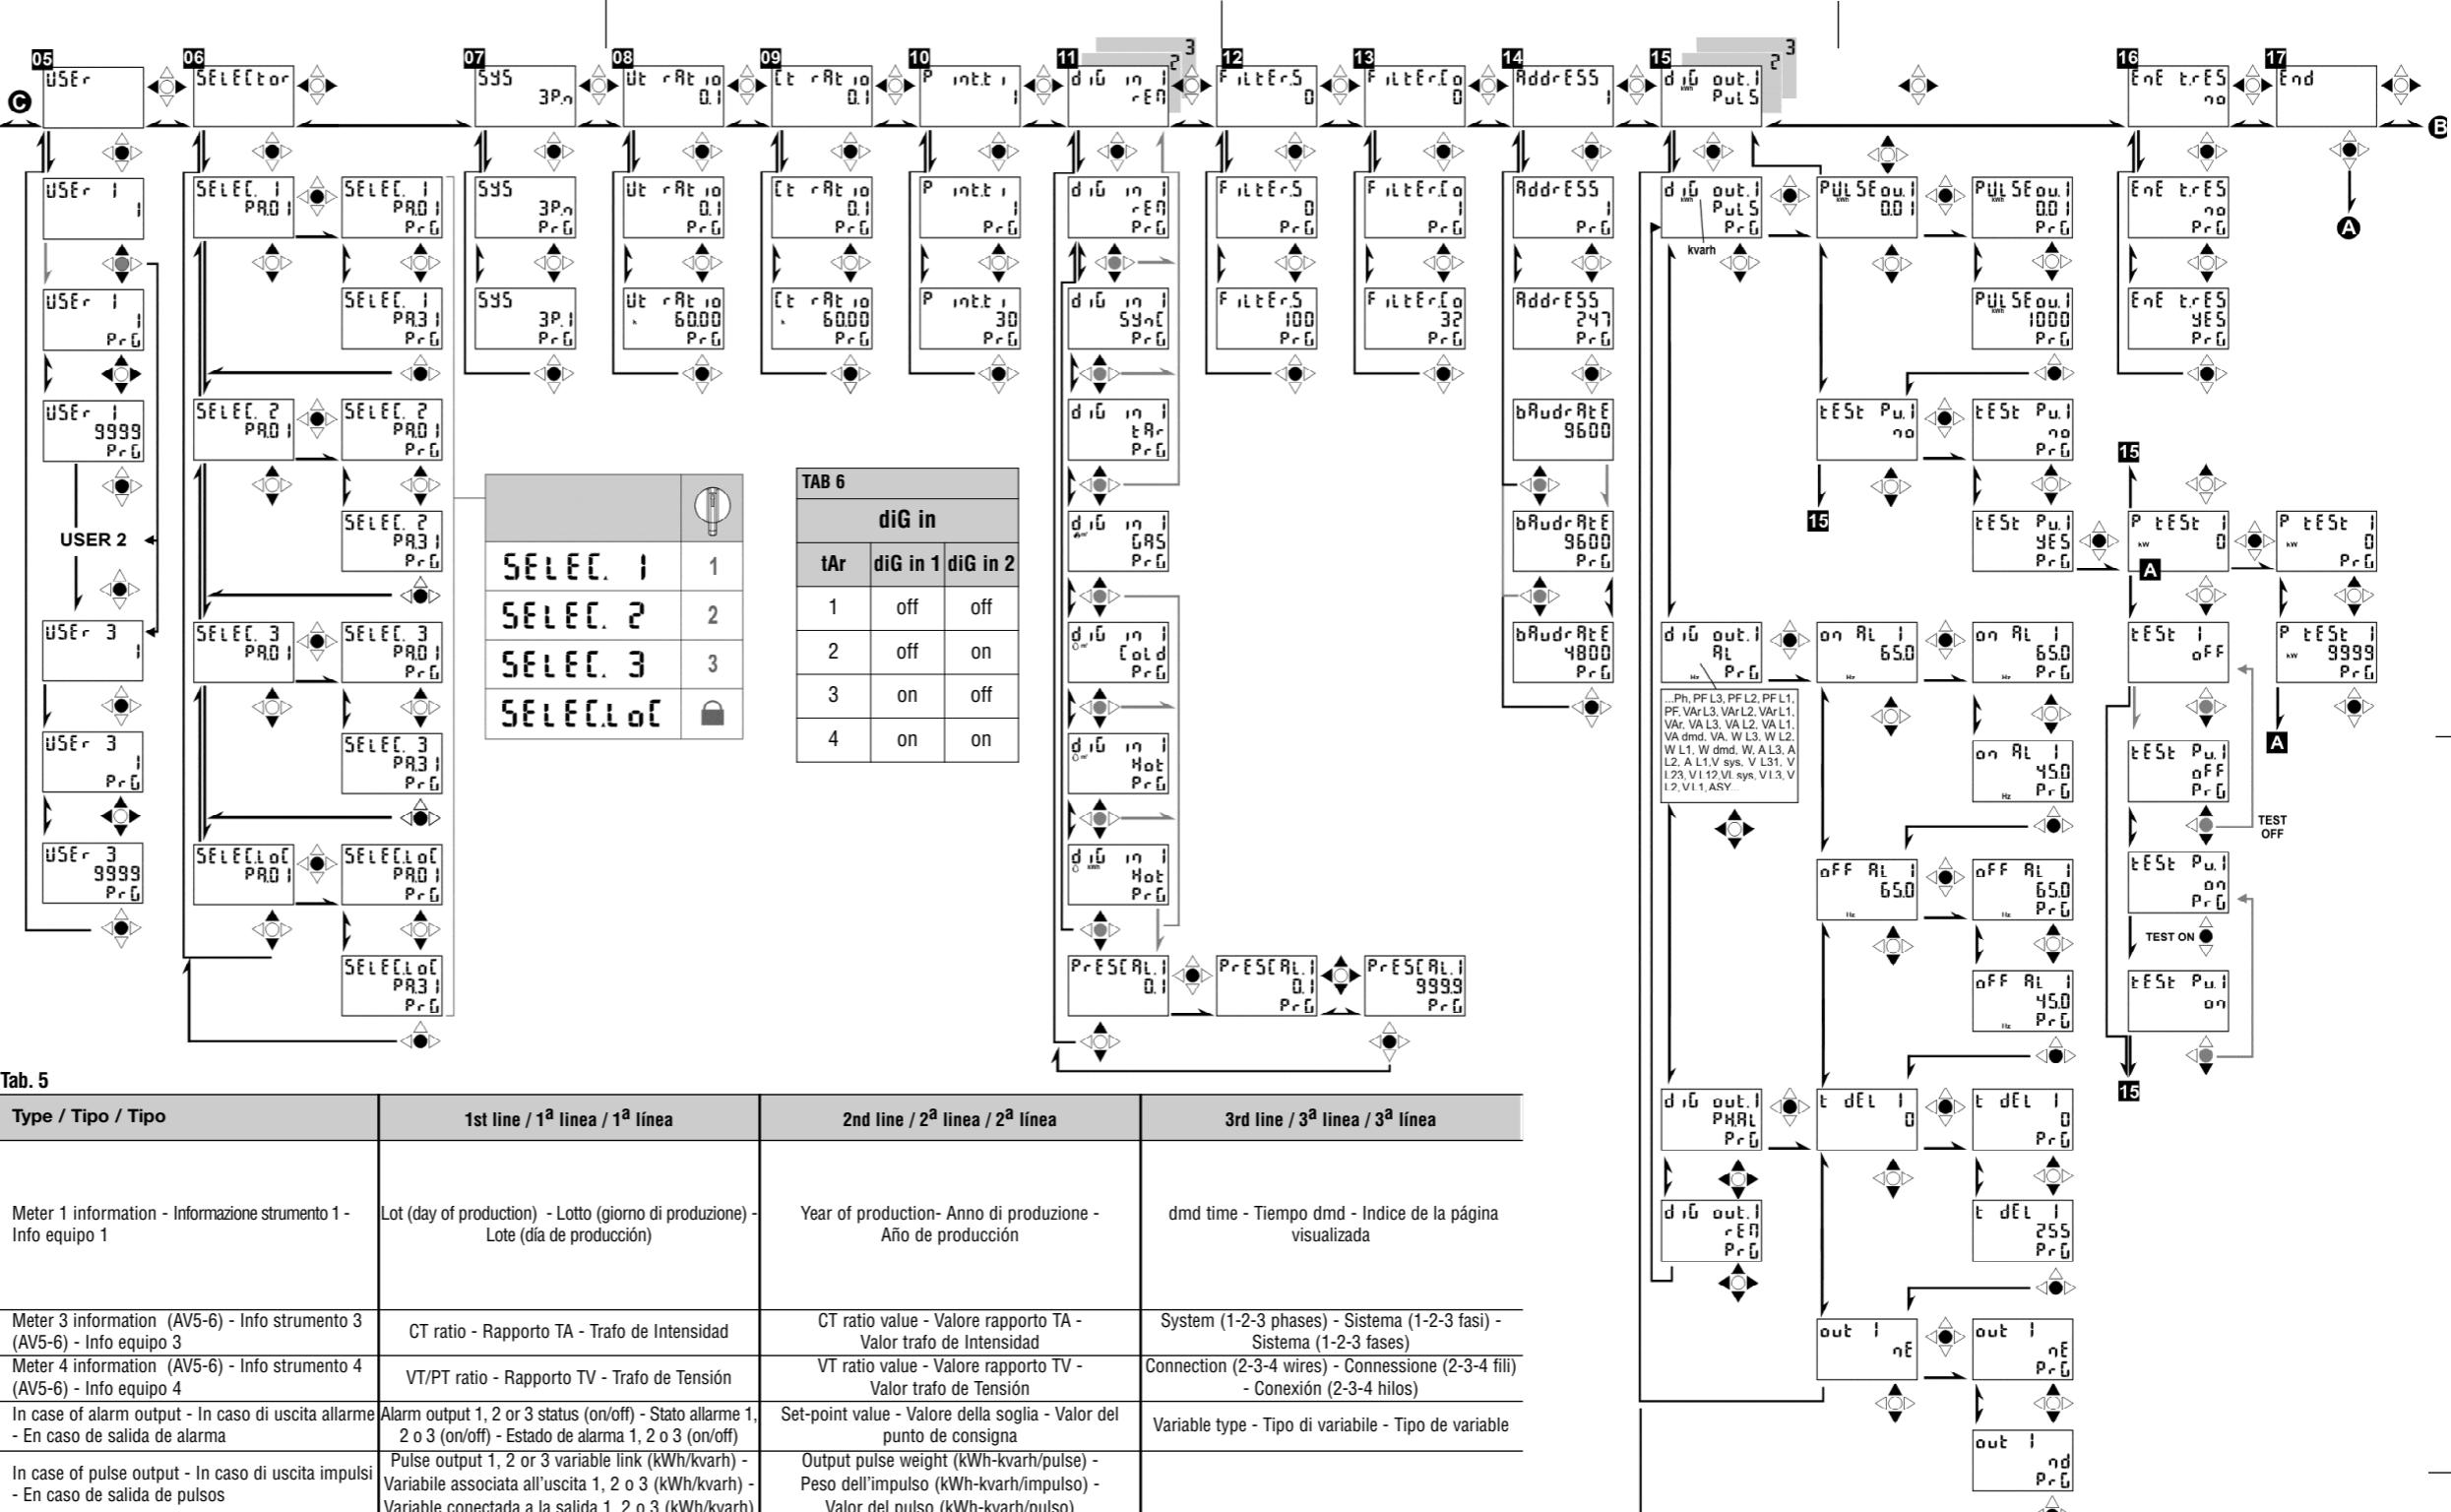

07 SYS : sistema elettrico: 3P.n: trifase sbilanciato con o senza neutro, 3P.I: trifase bilanciato con o senza neutro, 2P: bifase, 1P: monofase.

08 Ut rAtio : rapporto TV (da 0,1 a 6000). **Esempio:** se il primario del TV connesso è di 5kV e il secondario è di 100V il rapporto di TV corrisponde a 50 (ottenuto eseguendo il calcolo: 5000/100).

09 Ct rAtio : rapporto TA (da 0,1 a 60.00k). **Esempio:** se il primario del TA ha una corrente di 3000A e il secondario di 5A, il rapporto TA corrisponde a 600 (ottenuto eseguendo il calcolo: 3000/5).

10 P int.ti : tempo di integrazione per il calcolo della potenza media: selezionare il tempo desiderato da 1 a 30 minuti.

11 diG in 1 / diG in 2 / diG in 3 : (solo con opzione "I3") funzione

Tab. 5

Type / Tipo / Tipo	1st line / 1 ^a linea / 1 ^a línea	2nd line / 2 ^a linea / 2 ^a línea	3rd line / 3 ^a linea / 3 ^a línea
Meter 1 information - Informazione strumento 1 - Info equipo 1	Lot (day of production) - Lotto (giorno di produzione) - Lote (día de producción)	Year of production- Anno di produzione - Año de producción	dmd time - Tiempo dmd - Índice de la página visualizada
Meter 3 information (AV5-6) - Info strumento 3 (AV5-6) - Info equipo 3	CT ratio - Rapporto TA - Trafo de Intensidad	CT ratio value - Valore rapporto TA - Valor trafo de Intensidad	System (1-2-3 phases) - Sistema (1-2-3 fasi) - Sistema (1-2-3 fases)
Meter 4 information (AV5-6) - Info strumento 4 (AV5-6) - Info equipo 4	VT/PT ratio - Rapporto TV - Trafo de Tensión	VT ratio value - Valore rapporto TV - Valor trafo de Tensión	Connection (2-3-4 wires) - Connessione (2-3-4 fili) - Conexión (2-3-4 hilos)
In case of alarm output - In caso di uscita allarme - En caso de salida de alarma	Alarm output 1, 2 or 3 status (on/off) - Stato allarme 1, 2 o 3 (on/off)	Set-point value - Valore della soglia - Valor del punto de consigna	Variable type - Tipo di variabile - Tipo de variable
In case of pulse output - In caso di uscita impuls - En caso de salida de pulsos	Pulse output 1, 2 or 3 variable link (kWh/kvarh) - Variabile associata all'uscita 1, 2 o 3 (kWh/kvarh) - Variable conectada a la salida 1, 2 o 3 (kWh/kvarh)	Output pulse weight (kWh-kvarh/pulse) - Peso dell'impulso (kWh-kvarh/impulso) - Valor del pulso (kWh-kvarh/pulso)	
In case of communication port - Con porta di comunicazione - Con puerto de comunicación	Serial port - Porta seriale - Puerto serie	Address - Indirizzo - Dirección	RS485 status (RX-TX) - Stato della RS485 (RX-TX) - Estado RS485 (RX-TX)

rio del trafo conectado es 5kV y el secundario es 100V, la relación del trafo de tensión es 50 (es decir, 5000/100).

09 Ct rAtio: relaciòn del trafo de intensidad CT (0,1 a 60.00k). Ej.: si el primario del trafo conectado es 3000A y el secundario es 5A, la relaciòn del trafo de intensidad es 600 (es decir, 3000/5).

10 P int.ti: es el tiempo de integraciòn usado para calcular las potencias demandadas (Wdmd, VAdmd). El rango seleccionable està entre 1 y 30 minutos.

11 diG in 1 / diG in 2 / diG in 3 (sólo opción "I3"): permite definir la función de las entradas digitales: rEM: para lectura del estado de la entrada digital mediante el puerto de comunicación serie; SYnC: cálculo de la sincronización dmd; tAr: gestión multitarifa (ver también Tab. 6); GAS: medición de gas; Cold: medición de agua fría; Hot: medición de agua caliente; kWh+Hot: lectura remota de calefacciòn (kWh). PrESCAL.1 (o 2 ó 3): fija el valor de cada pulso (de 0,1 a 999,9m³ o kWh cada pulso). Si las entradas digitales son empleadas para medir: GAS, agua fría, agua caliente o calefacciòn remota cada entrada digital debe fijarse con una funciòn diferente.

12 FiLTER.S: permite seleccionar el rango de funcionamiento del filtro digital como % del valor a fondo de escala (1 a 100). Solo para aplicaciones: F, G, H.

13 FiLTER.Co: permite seleccionar el coeficiente de filtrado (de 1 a 32). Cuanto mayor sea el coeficiente, mayor es la estabilidad y el tiempo de actualización de la medida.

14 AddrESS (sólo opción "SI"): permite seleccionar la dirección serie del instrumento (de 1 a 247). bAudrAtE: permite seleccionar los baudios (9.600 ó 4.800).

15 diG out. 1 / diG out. 2 / diG out. 3 (sólo opciones "01, R2 o 03"): permite seleccionar la función de las salidas digitales. PuLS: selección de salida de pulsos, hay que fijar también el valor del pulso (kWh/kvarh por pulso de 0,001 a 10.0); tEST: activado en la salida de pulsos cuando se selecciona "YES". En el siguiente programa del menú, el valor de potencia simulado (kW o Kvar) se corresponde a una frecuencia de pulso proporcional y basado en "PULSE ou. 1/2/3". El test está activo hasta que se sale de este menú. AL: selección salida de alarma (esta función está activa sólo en el caso de las aplicaciones C, E, G y H), selección de la variable a controlar (Ph.AL: alarma de secuencia de fase) activación y desactivación de los puntos de consigna "on AL" y "off AL", retardo a la activación "tDEl" (de 0 a 255 segundos) y estado de las salidas en condición normal, hay que fijar también "nE" si es normalmente activada o "nd" si es normalmente desactivada. rEM: permite el control remoto de la salida digital.

16 EnE t.rES: permite la puesta a cero de todos los contadores totales.

17 End: permite salir del modo de programación presionando el joystick en dirección 1 (ver fig. 1). Las direcciones 4 y 5 del joystick permiten ir de nuevo al menú principal.

The menus availability depends on the "APPLiCAT" selection. La presenza dei menù è in funzione della selezione "APPLiCAT". La disponibilidad de los menús depende de la selección "APPLiCAT".

ESPAÑOL

PROGRAMACIÓN AVANZADA

05 USER: (solo "APPLiCAT" d) vincula un código ID (de 1 a 9999) al usuario del consumo visualizado (tres usuarios monofásicos independientes por instrumento).

06 SELECTor: permite seleccionar la combinación de variables (página) a visualizar, según la posición del interruptor (ver fig. 2); SELEC. 1 (2, 3, LoC): selecciona la posición del interruptor (1, 2, 3 o □); PA.1 (36): selecciona el número de página a visualizar (desde 1 a 36, ver TAB 3). Si la página relativa a la posición actual del selector no está disponible para la aplicación deseada, el instrumento visualizará la primera página disponible según la lista de la tabla 3.

07 SYS: Permite seleccionar el sistema eléctrico. 3P.n: trifásico desbalanceado con o sin neutro; 3P.I: trifásico equilibrado con o sin neutro; 2P: bifásico; 1P: monofásico.

08 Ut rAtio: relación del trafo de tensión VT (0,1 a 6000). **Ejemplo:** si el primario del VT connesso es de 5kV y el secundario es de 100V el rapporto di TV corrisponde a 50 (ottenuto eseguendo il calcolo: 5000/100).

09 Ct rAtio : rapporto TA (da 0,1 a 60.00k). **Ejemplo:** se il primario del TA ha una corrente di 3000A e il secondario di 5A, il rapporto TA corrisponde a 600 (ottenuto eseguendo il calcolo: 3000/5).

10 P int.ti : tiempo di integración per il calcolo della potenza media: selezionare il tempo desiderato da 1 a 30 minuti.

11 diG in 1 / diG in 2 / diG in 3 : (solo con opción "SI") funzione

ingressi digitali: rEM: per la remozione dello stato degli ingressi digitali; SYnC: sincronizzazione; tAr: tariffazione (Tab. 6); GAS: contatore gas; Cold: contatore acqua fredda; Hot: contatore acqua calda; kWh + Hot: teleriscaldamento (kWh). PrESCAL.1 (o 2 o 3): impostazione peso impuls (da 0,1 a 999,9 m³ o kWh per impulso). Nota: nel caso di utilizzo per GAS, CoLd o HoT kWh+ Hot, gli ingressi digitali devono essere impostati con modalità differenti tra loro.

12 FiLTER.S : campo di intervento del filtro digitale espresso in % del valore di fondo scala (da 1 a 100). Solo per applicazioni F, G e H.

13 FiLTER.Co : coefficiente di filtraggio da 1 a 32. Aumentando el coeficiente aumenta la estabilidad e il tempo di assestamento dei valori visualizados.

14 AddrESS : (solo con opción "SI") dirección serie: da 1 a 247. bAudrAtE: velocidad di transmisión dati (9.600; 4.800 bit/s).

15 diG out. 1 / diG out. 2 / diG out. 3 (sólo opciones "01, R2 o 03"): permite seleccionar la función de las salidas digitales. PuLS: selección de salida de pulsos, hay que fijar también el valor del pulso (kWh/kvarh por pulso de 0,001 a 10.0); tEST: activado en la salida de pulsos cuando se selecciona "YES". En el siguiente programa del menú, el valor de potencia simulado (kW o Kvar) se corresponde a una frecuencia de pulso proporcional y basado en "PULSE ou. 1/2/3". El test está activo hasta que se sale de este menú. AL: selección salida de alarma (esta función está activa sólo en el caso de las aplicaciones C, E, G y H), selección de la variable a controlar (Ph.AL: alarma de secuencia de fase) activación y desactivación de los puntos de consigna "on AL" y "off AL", retardo a la activación "tDEl" (de 0 a 255 segundos) y estado de las salidas en condición normal, hay que fijar también "nE" si es normalmente activada o "nd" si es normalmente desactivada. rEM: permite el control remoto de la salida digital.

16 EnE t.rES: permite la puesta a cero de todos los contadores totales.

17 End: permite salir del modo de programación presionando el joystick en dirección 1 (ver fig. 1). Las direcciones 4 y 5 del joystick permiten ir de nuevo al menú principal.

The menus availability depends on the "APPLiCAT" selection. La presenza dei menù è in funzione della selezione "APPLiCAT". La disponibilidad de los menús depende de la selección "APPLiCAT".

SAFETY PRECAUTIONS

Read carefully the instruction manual. If the instrument is used in a manner not specified by the producer, the protection provided by the instrument may be impaired. **Maintenance:** make sure that the connections are correctly carried out in order to avoid any malfunctioning or damage to the instrument. To keep the instrument clean, use a slightly damp cloth; do not use any abrasives or solvents. We recommend to disconnect the instrument before cleaning it.

TECHNICAL SPECIFICATIONS

Input specification: Rated inputs: system type: 3. Current type: galvanic insulation by means of built-in CT's. Current range (by CT) AV5 and AV6: 1/5(10)A. Voltage by direct connection or VT/PT: AV5: 230/400VLL; AV6: 120/208VLL. **Accuracy** (Display + RS485) (@25°C ±5°C, R.H. ≤60%, 48 a 62Hz): AV5 model: In: 5A, Imax: 10A; Un: 160 a 480VNL (277 a 830VLL). AV6 model: In: 5A, Imax: 10A; Un: 40 a 144VNL (70 a 250VLL). Current (AV5, AV6 models): from 0.002In to 0.2In: ±(0.5% RDG +3DGT); from 0.2In to Imax: ±(0.5% RDG +1DGT). Phase-neutral voltage: In the range Un: ±(0.5% RDG +1DGT). Phase-phase voltages In the range Un: ±(1% RDG +1DGT). Frequency: ±0.1Hz (45 to 65Hz). Active and Apparent power: ±(1%RDG +2DGT). Power Factor: ±[0.001+1% (1.000 - "PF RDG")]. Reactive power: ±(2%RDG +2DGT). Energies: Class 1 according to EN62053-21 and MID Annex MI-003 Class B Class 2 according to EN62053-23. AV5, AV6 models: In: 5A, Imax: 10A; 0.1 In: 0.5A. Start up current: 10mA. Harmonic distortion: ±3% F.S. (up to 15th harmonic (F.S.: 100%). **Energy additional errors:** influence quantities according to EN62053-21, EN62053-23. **Temperature drift:** ≤200ppm/°C. **Sampling rate:** 1600 samples/s @ 50Hz, 1900 samples/s @ 60Hz. **Display refresh time:** 750 msec. **Display:** 3 lines (1 x 8 DGT; 2 x 4 DGT). Type LCD, h 9.5mm, dual colour backlight (selectable). Instantaneous variables read-out: 4 DGT. Energies Imported: Total/Partial/Tariff: 7+1DGT or 8DGT; Exported: Total/Partial/Tariff: 6+1DGT or 7DGT (with " sign). Overload status: EEEE indication when the value being measured is exceeding the "Continuous inputs overload" (maximum measurement capacity). Max. and Min. indication: Max. instantaneous variables: 9999; energies: 9 999 999.9 or 99 999 999. Min. instantaneous variables: 0; energies 0.0 or 0. **LEDs:** red LED (Energy consumption), 1000 imp./kWh/kvarh. Max frequency: 16Hz according to EN62052-11. **Measurements:** method TRMS measurements of distorted wave forms. Coupling type by means of external CT's. **Crest factor:** ≤3 (15A max. peak). **Current Overloads:** continuous, 10A, @ 50Hz, for 500ms 200A, @ 50Hz. **Voltage Overloads:** continuous 1.2 Un. For 500ms 2 Un. **Input impedance:** 208VL-L (AV6) >1MΩ. 400VL-L (AV5) >1MΩ. 1/5(10) A (AV5-AV6) < 0.3VA. **Frequency:** 45 to 65 Hz. **Joystick:** for variable selection: programming of the instrument working parameters and Wdmd max reset.

Digital outputs: pulse type: number of outputs: up to 3, independent. Programmable from 0.001 to 10.00 pulses per kWh/kvarh per pulse. Type: outputs connectable to the energy meters (Wh/varh). Pulse duration: ≥100ms < 120msec (ON), ≥120ms (OFF), according to EN62052-31. **Alarm type:** number of outputs up to 3 independent. Alarm modes: up alarm, down alarm. Set-point adjustment From 0 to 100% of the display scale. Hysteresis: from 0 to full scale, on-time delay: 0 to 255s. Output status: selectable normally de-energized or normally energized. Min. response time: ≤ 700ms, filters excluded and set-point on-time delay: "0 s". **Remote control:** this selection allows the remote control of the digital output (from PC by means of serial communication port). **Note:** the 3 digital outputs can also work as a triple pulse output, triple alarm output, or in any other combination. **Static output:** physical outputs: max. 3, purpose: for pulse output, alarm output or remote control. Signal V_{on}: 1.2VDC/ max. 100 mA, V_{off}: 30VDC max. Insulation: by means of optocouplers: 4000VRMS output to measuring inputs; 4000 VRMS output to power supply input. **Relay output:** physical outputs 2. Purpose: for alarm output, pulse output or remote control. Type: relay, SPST type: AC 1-5A @ 250VAC, DC 12-5A @ 24VDC, AC 15-1.5A @ 250VAC, DC 13-1.5A @ 24VDC. Insulation: 4000VRMS output to measuring input. 4000 VRMS output to power supply input. **RS485:** type multidrop, bidirectional (static and dynamic variables). Connections: 2-wire. Max. distance 1000m. Termination directly on the instrument. Addresses: 247, selectable by means of the front joystick. Protocol: MODBUS/JBUS (RTU). Data (bidirectional). Dynamic (reading only): System and phase variables; static (reading and writing): all the configuration parameters. Data format: 1 start bit, 8 data bit, no parity, 1 stop bit. Baudrate: 4800, 9600 bits/s. Driver input capability: 1/5 unit load, maximum 160 transceivers on the same bus. Insulation: by means of optocouplers: 4000VRMS output to measuring input; 4000VRMS output to power supply input. Note: By means of the RS485 serial communication port, it's possible to manage also the tariff change (only for APPLICAT C, F, G, H) in order to count energy by tariffs (T1, T2, T3, T4). This feature is available only on the models with "I3" option. None of these 3 digital inputs has to be set as "Ar".

Digital input specifications: number of inputs: 3. Input frequency: 20Hz max, duty cycle 50%. Prescaler adjustment: from 0,1 to 999,9 m³ o kWh/pulse. Contact measuring voltage: 5VDC +/- 5%. Contact measuring current: 10mA max. Input impedance: 680Ω. Contact resistance: ≤100Ω (closed contact), ≥500Ω (open contact). Working modes selectable: total and partial energy meters (kWh and kvarh) without digital inputs; total and partial energy meters (kWh and kvarh) managed by time periods (t1-t2-t3-t4), W dmd synchronisation (the synchronisation is made every time the tariff changes) and GAS (m³) or WATER (hot-cold m³) or remote heating (kWh) meters; total and partial energy meters (kWh and kvarh) managed by time periods (t1-t2), W dmd synchronisation (the synchronisation is made independently from the tariff selection) and GAS (m³) or WATER (hot-cold m³) or remote heating (kWh) meters; total energy (kWh, kvarh) and GAS, WATER (hot-cold m³) and remote heating meters (3 choices only). Note: the energy metering is only made by means of the analogue inputs. If the rEM function is selected, it's possible to read remotely the digital input status. Insulation: by means of optocouplers: 4000 VRMS digital inputs to measuring inputs; 4000 VRMS digital inputs to power supply input.

Software Functions: **Password:** numeric code of max. 4 digits; 2 protection levels of the programming data: 1st level: password "0": no protection; 2nd level: password from 1 to 9999; all data are protected. **System selection:** system 3-Ph.n: unbalanced load 3-phase (3 or 4 wires). System 3-Ph.1: balanced load, 3-phase (3-wire) one current and 3-phase to phase voltage measurements or 3-phase (4-wire) one current and 1-phase (L1) to neutral voltage measurements. System 2-Ph: 2-phase (3-wire). System 1-Ph: 1-phase (2-wire). **Transformer ratio:** VT (PT) 1.0 to 999.9 / 1000 to 9999 / 10.000 to 60.000. The maximum power being measured cannot exceed 210MW (calculated as maximum input voltage and current, see the "Accuracy" paragraph above. The maximum VT by CT ratio is 48600. If the currents and/or volt-

ages being measured exceed their maximum limits the display shows the error message "EEEE". For MID compliant applications the maximum power being measured is 25 MW. **Filter:** operating range: 0 to 100% of the input display scale; Filtering coefficient: 1 to 32. Filter action: measurements, serial output (fundamental variables: V, A, W and their derived ones). **Displaying:** up to 3 variables per page, 8 different set of variables available, according to the application being selected. **Alarm highlight:** in case of alarm and if the relevant function is enabled, the display changes the colour alternatively from white backlight to blue backlight and vice versa. **Reset:** by means of the front joystick: dmd and max. dmd; total energies and gas/water, kWh, kvarh; partial energies and tariffs. **Harmonic analysis:** up to the 15th harmonics on single current and voltage. **Easy connection function:** for all the display selections, both energy and power measurements are independent from the current direction: the displayed energy is always "imported" (with the only exception of "E", "F" and "H" types, for those selections the energies can be either "imported" or "exported" depending on the current direction). **General specifications. Operating temperature:** -25°C to +55°C (-13°F to 131°F) (R.H. from 0 to 90% non-condensing @ 40°C) according to EN62053-21 and EN62053-23. **Storage temperature:** -30°C to +70°C (-22°F to 140°F) (R.H. < 90% non-condensing @ 40°C) according to EN62053-21 and EN62053-23. **Installation category:** Cat. III (IEC60664, EN60664). **Insulation (for 1 minute):** 4000VRMS between measuring inputs and power supply; 4000VRMS between power supply and RS485 digital outputs. **Dielectric strength:** 4000VRMS for 1 minute. **Noise rejection CMRR** 100 dB, 48 to 62 Hz. **EMC:** according to EN62052-11. Electrostatic discharges 15kV air discharge; Immunity to irradiated test with current: 10V/m from 80 to 2000MHz; Electromagnetic fields test without any current: 30V/m from 80 to 2000MHz; Burst on current and voltage measuring inputs circuit: 4kV. Immunity to conducted disturbances 10V/m front 150kHz to 80MHz. Surge on current and voltage measuring inputs circuit: 4kV; on "L" auxiliary power supply input: 1kV; Radio frequency suppression according to CISPR 22. **Standard compliance:** safety IEC60664, IEC61010-1 EN60664, EN61010-1 EN62052-11. Metrology EN62053-21, EN62053-23. MID "annex MI-003", pulse output DIN43864, IEC62053-31. Approvals: CE, UL. **Connections:** screw-type, cable cross-section area: Max. 1.5 mm². **Housing:** dimensions (WxHxD) 96 x 96 x 63 mm. Material: ABS, self-extinguishing: UL 94 V-0. Mounting: panel mounting. **Protection degree:** front: IP50, screw terminals: IP20. **Weight:** approx. 400 g (packing included). **Auxiliary power supply:** L: 18 to 60VAC/DC; H: 90 to 260VAC/DC (48 to 62Hz). **Power consumption:** AC: 6VA; DC: 3.5 W

MID "Annex MI-003" compliance
Accuracy: 0.9 Un ≤ U ≤ 1.1 Un; 0.98 fn ≤ f ≤ 1.02 fn; fn: 50 or 60Hz; cosφ: 0.5 inductive to 0.8 capacitive. AV5-AV6 models. Class B I st: 0.01A; I min: 0.05A; I tr: 0.25A; I n: 5A; I max: 10A. **Operating temperature:** -25°C to +55°C (-13°F to 131°F) (R.H. from 0 to 90% non-condensing @ 40°C). **EMC compliance:** E2.

ITALIANO

NORME DI SICUREZZA

Leggere attentamente il manuale istruzioni. Qualora l'apparecchio venisse adoperato in un modo non specificato dal costruttore, la protezione prevista dall'apparecchio potrebbe essere compromessa. **Manutenzione:** assicurarsi che i collegamenti siano effettuati correttamente al fine di evitare qualsiasi malfunzionamento o danneggiamento dello strumento. Per mantenere pulito lo strumento usare un panno leggermente inumidito; non usare abrasivi o solventi. Si consiglia di scollare lo strumento prima di pulirlo.

CARATTERISTICHE TECNICHE

Ingressi di misura: sistema: 3. Tipo corrente: Isolamento galvanico mediante TA integrati; campo di misura (da TA) AV5 e AV6: 1/5(10)A. Tensione collegamento diretto o mediante TV. AV5: 230/400VLL; AV6: 120/208VLL. **Precisione:** (Display + RS485) (@25°C ±5°C, U.R. ≤60%, 48 a 62Hz): modello AV5: In: 5A, Imax: 10A; Un: da 160 a 480VNL (da 277 a 830VLL). Modello AV6: In: 5A, Imax: 10A; Un: da 40 a 144VNL (70 a 250VLL). Corrente (modelli AV5, AV6): da 0.002In a 0.2In: ±(0.5% RDG +3DGT); da 0.2In a Imax: ±(0.5% RDG +1DGT). Tensione fase-neutro: nel campo Un: ±(0.5% RDG +1DGT). Tensione fase-fase nel campo Un: ±(1% RDG +1DGT). Frequenza: ±0.1Hz (da 45 a 65Hz). Potenza attiva apparente: ±(1%RDG +2DGT). Fattore di potenza: ±[0.001+1% (1.000 - "PF RDG")]. Potenza reattiva: ±(2%RDG +2DGT). Energie: classe 1 secondo EN62053-21 e MID allegato MI-003 Classe B; Classe 2 secondo EN62053-23. Modelli AV5, AV6: In: 5A, Imax: 10A; 0.1 In: 0.5A. Corrente di avviamento: 10mA. Distorsione armonica: ±3% F.S. (fino alla 15ª armonica (F.S.: 100%). **Errori addizionali:** grandezze di influenza secondo EN62053-21, EN62053-23. **Deriva termica:** ≤200ppm/°C. **Frequenza di campionamento:** 1600 campioni/s @ 50Hz, 1900 campioni/s @ 60Hz. **Tempo di aggiornamento display:** 750msec.

Display: 3 linee (1 x 8 DGT; 2 x 4 DGT). Tipo: LCD, h 9.5mm, retroilluminazione bicolore (selezionabile). Lettura variabili istantanee: 4 DGT. Energie Importate: Total/Parziali/Tariffe: 7+1DGT o 8DGT; Esportate: Total/Parziali/Tariffe: 6+1DGT o 7DGT (con il segno "-"). Sovraccarico: il display visualizza EEEE quando il valore misurato eccede il "sovraffatto continuativo max." (max. capacità di misura). Indicazioni max. e min.: variabili istantanee max.: 9999; energie: 9 999 999.9 o 99 999 999; Variabili istantanee min.: 0; energie 0 o 0.

LED: rosso (energia consumata), 1000 impulsi/kWh/kvarh. Frequenza lampaggio: max: 16Hz secondo EN62052-11. **Misure:** metodo TRMS misura delle forme d'onda distorte. Tipo di accoppiamento mediante TA. **Fattore di cresta:** ≤3 (15A max. picco). **Sovraccarico corrente:** continuo 10A, a 50Hz. Per 500ms 200A, 50Hz. **Sovraccarico tensione:** continuo 1.2 Un; per 500ms 2 Un. **Impedenza d'ingresso:** 208VL-L (AV6) >1MΩ; 400VL-L (AV5) >1MΩ; 1/5(10)A (AV5-AV6) < 0.3VA; **Frequenza:** da 45 a 65 Hz. **Joystick:** Per la selezione delle variabili e la programmazione dei parametri di funzionamento dello strumento e reset dei valori Wdmd max.

Uscite digitali: **Uscita impuls:** numero uscite fino a 3, indipendenti, programmabile da 0.001 a 10.00 kWh/kvarh per impulso. Tipo: uscite associabili ai contatori di energia (Wh/varh). Durata dell'impulso ≥100ms < 120msec (ON), ≥120ms (OFF), secondo EN62052-31. **Uscita allarme:** Numero uscite fino a 3, indipendenti. Modalità degli allarmi: allarme di massima, allarme di minima. Regolazione soglia: da 0 a 100% della scala visualizzata. Isteresi: da 0 a fondo scala. Ritardo all'attivazione da 0 a 255s. Stato dell'uscita: selezionabile normalmente eccitato o normalmente diseccitato. Tempo minimo di risposta ≤700ms, filtri esclusi. Ritardo all'attivazione: "0 s". **Controllo remoto:** questa selezione permette il comando dell'uscita digitale in modo remoto (da PC tramite comunicazione seriale). **Note:** le 3 uscite digitali possono anche funzionare come tripla uscita impuls, tripla uscita allarme o in qualsiasi altra combinazione. **Uscite statiche:** uscite fisiche max. 3. Utilizzo per uscite impuls, allarme o controllo remo-

to. Segnale V_{ON}: 1.2 VCC/ max. 100mA, V_{OFF}: 30VCC max. Isolamento tramite optoisolatori: 4000VRMS tra uscite e ingressi di misura. 4000VRMS tra uscite alimentazione. **Uscite relè:** uscite fisiche max. 2. Utilizzo per uscite allarme o uscite impuls o controllo remoto. Tipo: relè, tipo SPST; CA 1-5A a 250VCA; CC 12-5A a 24VCC; CA 15-1.5A a 250VCA; CC 13-1.5A a 24VCC. Isolamento: 4000VRMS tra uscite e ingressi di misura e alimentazione. 4000VRMS tra uscite e ingressi di misura. **RS485:** tipo Multidrop, bidirezionale (variabili statiche e dinamiche). Connessione 2 fili distanza massima 1000m. Terminazione direttamente sullo strumento. Indirizzi 247, selezionabili mediante joystick frontale. Protocollo: MODBUS/JBUS (RTU). Dati (bidirezionali). Dynamic (reading only): System and phase variables; static (reading and writing): all the configuration parameters. Data format: 1 start bit, 8 data bit, no parity, 1 stop bit. Baudrate: 4800, 9600 bits/s. Driver input capability: 1/5 unit load, maximum 160 transceivers on the same bus. Insulation: by means of optocouplers: 4000VRMS output to measuring inputs; 4000 VRMS output to power supply input. Note: By means of the RS485 serial communication port, it's possible to manage also the tariff change (only for APPLICAT C, F, G, H) in order to count energy by tariffs (T1, T2, T3, T4). This feature is available only on the models with "I3" option. None of these 3 digital inputs has to be set as "Ar".

Digital input specifications: number of inputs: 3. Input frequency: 20Hz max, duty cycle 50%. Prescaler adjustment: from 0,1 to 999,9 m³ o kWh/pulse. Contact measuring voltage: 5VDC +/- 5%. Contact measuring current: 10mA max. Input impedance: 680Ω. Contact resistance: ≤100Ω (closed contact), ≥500Ω (open contact). Working modes selectable: total and partial energy meters (kWh and kvarh) without digital inputs; total and partial energy meters (kWh and kvarh) managed by time periods (t1-t2-t3-t4), W dmd synchronisation (the synchronisation is made every time the tariff changes) and GAS (m³) or WATER (hot-cold m³) or remote heating (kWh) meters; total and partial energy meters (kWh and kvarh) managed by time periods (t1-t2), W dmd synchronisation (the synchronisation is made independently from the tariff selection) and GAS (m³) or WATER (hot-cold m³) or remote heating (kWh) meters; total energy (kWh, kvarh) and GAS, WATER (hot-cold m³) and remote heating meters (3 choices only). Note: the energy metering is only made by means of the analogue inputs. If the rEM function is selected, it's possible to read remotely the digital input status. Insulation: by means of optocouplers: 4000 VRMS digital inputs to measuring inputs; 4000 VRMS digital inputs to power supply input. Note: By means of the RS485 serial communication port, it's possible to manage also the tariff change (only for APPLICAT C, F, G, H) in order to count energy by tariffs (T1, T2, T3, T4). This feature is available only on the models with "I3" option. None of these 3 digital inputs has to be set as "Ar".

Software Functions: **Password:** numeric code of max. 4 digits; 2 protection levels of the programming data: 1st level: password "0": no protection; 2nd level: password from 1 to 9999; all data are protected. **System selection:** system 3-Ph:n: unbalanced load 3-phase (3 or 4 wires). System 3-Ph.1: balanced load, 3-phase (3-wire) one current and 3-phase to phase voltage measurements or 3-phase (4-wire) one current and 1-phase (L1) to neutral voltage measurements. System 2-Ph: 2-phase (3-wire). System 1-Ph: 1-phase (2-wire). **Transformer ratio:** VT (PT) 1.0 to 999.9 / 1000 to 9999 / 10.000 to 60.000. The maximum power being measured cannot exceed 210MW (calculated as maximum input voltage and current, see the "Accuracy" paragraph above. The maximum VT by CT ratio is 48600. If the currents and/or volt-

(variables being measured exceed their maximum limits the display shows the error message "EEEE"). For MID compliant applications the maximum power being measured is 25 MW. **Filter:** operating range: 0 to 100% of the input display scale; Filtering coefficient: 1 to 32. Filter action: measurements, serial output (fundamental variables: V, A, W and their derived ones). **Displaying:** up to 3 variables per page, 8 different set of variables available, according to the application being selected. **Alarm highlight:** in case of alarm and if the relevant function is enabled, the display changes the colour alternatively from white backlight to blue backlight and vice versa. **Reset:** by means of the front joystick: dmd and max. dmd; total energies and gas/water, kWh, kvarh; partial energies and tariffs. **Harmonic analysis:** up to the 15th harmonics on single current and voltage. **Easy connection function:** for all the display selections, both energy and power measurements are
